

## metastase

you will always be  
a part of me  
i love you like the rest

you are just too young  
and have to grow  
your cradle in my chest

you eat from me  
i like to give  
we know you have to live

i can already feel you  
underneath my skin  
supress young lives is sin

life breeds life  
it's the natural way  
you grow up  
i fade away
